2nd Annual Westmead Endoscopy Symposium

Thursday 5th - Friday 6th March 2009
Nurses Workshop Wednesday 4th March

Lowenthal Auditorium, Westmead Hospital, Sydney

International Faculty:
- Prof Paul Fockens, Netherlands
- Prof Paul Kortan, Canada
- Prof Shinji Tanaka, Japan
- Assoc Prof Marcia Canto, USA

Australian Faculty:
- Dr Warwick Selby, NSW
- Dr Arthur Kaffes, NSW

Invited Chairs:
- Dr David Abi-Hanna, NSW
- Dr Luke Hourigan, QLD
- Assoc Prof Ian Norton, NSW

Course Convenors:
- Dr Michael Bourke
- Dr Stephen Williams
- Dr Vu Kwan
- Ms Ellie McCann

PROGRAM AND COURSE SYLLABUS
Gold Sponsor Westmead Endoscopy Symposium and suppliers of:

- Pentax Endoscopes & Accessories.
- Medivators Endoscope Disinfectors.
- Simbionix GI Mentor.
- Hitachi Pentax Ultrasound System.
- Microline Pentax Laparoscopic Instrumentation.

We provide a Total Solution including:

- Loan scopes.
- On-site service.
- Equipment demonstrations.
- In-servicing & education.

Welcome

Ladies and Gentleman,
Dear Colleagues and Friends,

It is my great pleasure to welcome you to the 2nd Annual Westmead Endoscopy Symposium.

The 2008 meeting was a tremendous success. The response and support completely surpassed our expectations and we remain very grateful to all those who attended, and particularly to those who offered their support and congratulations following the meeting. We are totally committed to building on that success and once again have set ourselves the goal of a comprehensive demonstration of advanced techniques in diagnostic and therapeutic endoscopy.

The last few years have seen advances in both diagnostic and therapeutic Endoscopy that could scarcely have been imagined a decade ago and the speed of innovation continues at a pace not previously witnessed. Our program will aim to highlight these progressions in addition to the core fundamentals of good endoscopic practice. The content has been carefully designed and the cases judiciously selected to facilitate discussion around critical aspects of technique and points of controversy. A strong focus on the cognitive processes behind the delivery of high quality endoscopy will also feature. We encourage you to relay your questions through the panel to the proceduralist. Our invited guests are all internationally renowned authorities in their respective fields and their response to your questions and comments will enhance the meeting for you and other members of the audience.

Thursday will see the official conference dinner at The Malaya restaurant in the exciting King Street Wharf precinct. There are beautiful views from the restaurant over the picturesque Darling Harbour. The menu and wines have been carefully chosen, and I anticipate a relaxing evening amongst the conviviality of friends and colleagues.

Finally, on behalf of our Department and my co-convenors, Steve, Vu and Ellie, I thank you for your support and interest and for taking the time from your busy schedules to join us here for these two days. The international guests, in combination with our Australian faculty and the team from Westmead, will I believe provide a comprehensive and informative educational experience for you, and hopefully a very enjoyable one.

Yours sincerely

MICHAEL BOURKE.
Chairman Organising Committee Westmead Endoscopy Symposium 2009

International Faculty

Professor Paul Kortan, St. Michael’s Hospital, University of Toronto
Dr. Paul Kortan is an Associate Professor of Medicine at St. Michael’s Hospital, University of Toronto and where he is also the Director of the Gastroenterology Fellowship Training Programme. His clinical and research interests focus on endoscopic management of pancreaticobiliary diseases and endoscopic oncology. He is also on staff at The Hospital for Sick Children where he performs paediatric advanced therapeutic endoscopic procedures. He has been one of the directors of the annual International Course on Therapeutic Endoscopy held in Toronto since 1983.

Dr Shinji Tanaka, Professor, Hiroshima University Hospital
Dr Shinji Tanaka is Professor and Director of Department of Endoscopy, Hiroshima University Hospital. His speciality is diagnostic and therapeutic colonoscopy, and endoscopic and clinicopathological research of GI cancer. He is one of the leaders of Gastroenterological Endoscopy in Japan and he has been often invited to other countries for his diagnostic and therapeutic colonoscopic skill and knowledge, such as magnification, NBI and EMR/ESD.

Professor Paul Fockens, Academic Medical Center, University of Amsterdam
Professor Paul Fockens is professor of Gastrointestinal Endoscopy at the University of Amsterdam. He is also the Director of Endoscopy and vice-chair of the department of Gastroenterology and Hepatology of the Academic Medical Center at the University of Amsterdam. He is the current secretary general of the European Society of Gastrointestinal Endoscopy and chairman of the EURO-NOTES foundation. His clinical and research interests are advanced diagnostic and therapeutic endoscopy. He focusses on Barrett’s, colorectal cancer and pancreato-biliary imaging and therapy. The research is clinical as well as more fundamental with very regular use of the animal facility for acute and survival studies.

Associate Professor Marcia Canto, Johns Hopkins University School of Medicine
Dr Marcia Canto is Associate Professor in Medicine and Oncology at John Hopkins University. She is also the Director of Therapeutic Endoscopy, Endoscopic Ultrasonography and Clinical Research. She is a member of the editorial board for Clinical Gastroenterology and Hepatology and a reviewer for several journals. She has received numerous private foundation and NIH grants for her research on Barrett’s Oesophagus and pancreatic cancer and has published more than 100 scientific papers. Dr. Canto’s current primary clinical and research focus is on GERD, Barrett’s Oesophagus, oesophageal cancer, and pancreatic neoplasia.
Welcome to Nurses

It is my great pleasure to welcome you to the 2009 Westmead Endoscopy Symposium Nurses Workshop.

This workshop will compliment the subsequent two day live workshop, which will demonstrate some new and exciting techniques in gastrointestinal endoscopy.

The nursing workshop will provide a comprehensive coverage of the multidisciplinary management of patients undergoing routine and advanced endoscopy both in the elective and emergency setting.

The key areas of focus will be GIT bleeding, ERCP, Barrett’s oesophagus, colorectal polyps and Endoscopic Ultrasound.

All sessions will have a short presentation followed by a hands on demonstration of equipment.

We hope you enjoy the half day workshop and welcome those that are staying for the full two day live symposium with some of the world’s leading Endoscopists demonstrating their skill and new advances in endoscopy.

Yours sincerely

Ellie McCann.
Nurse Unit Manager

Where do we stand on excellence?

At Boston Scientific Endoscopy, we are never satisfied with the status quo, even when our devices are regarded as the gold standard. Advances in metal stents engineered to provide greater flexibility and deployment control; new guidewire coatings designed to enhance tracking and maneuverability; biopsy forceps engineered for larger tissue acquisition; fixed and wire-guided dilation balloons designed to achieve multiple sizes — these are just some of the many ways we continue to prove and improve our technologies to help you provide high quality patient care.

We prove it. Then improve it.
Olympus leading edge Endoscopy products and EndoTherapy Accessories can offer you THE TOTAL SOLUTION

For further information please contact our Customer Service Centre on 1300 132 992.

More Control, Less Stress.

The more control you have in a stent placement procedure, the less stressful that procedure can be. That’s why we created Evolution, the only stent delivery system with controlled release and recapturability. Now with unprecedented precision, you can deploy or recapture the stent. That means, if necessary, you get a second chance to perform a first-rate stent placement.
